Professional Summary

Seasoned Android and React Native Developer with 8+ years in Android and 5 years in React Native development. Proficient in Kotlin with 5 years of experience. Proficient in designing, testing, debugging, and optimizing applications. Dedicated to continuous improvement and adept in the full software development lifecycle

Skills

- **Languages:** Java, Kotlin, JavaScript
- **Mobile Development:** React Native, Android (Kotlin, Java)
- **Frameworks & Libraries:** Redux, Android Jetpack, Jetpack Compose, MVVM, ExoPlayer
- **Database:** Firebase Realtime Database, Room, Datastore
- **Architecture:** SOLID principles, Clean Code, Design Patterns, Refactoring, Test-Driven Development (TDD) , Clean Architecture, Functional Programming, Offline First
- **Other:** Git, Gitlab, Dependency Injection, Reactive Programming, XML/JSON-based RESTful APIs, Firebase, Push Notifications, Android Architecture Components

Work Experience

Senior Android/React Native Developer
CitrusBits, Islamabad, Pakistan | 10/2022 – 10/2023

- Developed testable code throughout the development cycle.
- Designed scalable and maintainable architecture, supporting large-scale application growth.
- Enhanced application speed by 10% through optimized code handling.
- Improved cross-functional collaboration, reducing bug resolution time by 15% and increasing product quality by 25%.
- Consistently reviewed code and integrated React Native into existing projects.

Senior Android Developer (Remote - Canada)
Creatrixe, Islamabad, Pakistan | 07/2021 – 07/2022

- Ensured designs met requirements across all development phases.
- Streamlined codebase, reducing size by 5% and implemented design patterns and dependency injection.
- Led a team of 5, managed projects, conducted client meetings, and Scrum sessions, increasing project efficiency by 5%.
- Integrated QR code scanning and fingerprint authentication functionalities.

- Served as Solution Architect for two products.
- Implemented offline storage solutions to ensure scalability during internet outages.
- Implemented application security by obfuscating code and encrypting stored data.

Senior Android Developer
IrisVision, Islamabad, Pakistan | 05/2019 – 04/2021
- Created well-designed, testable code throughout the development process.
- Improved cross-functional collaboration, reducing bug resolution time by 20% and enhancing product quality.
- Led a team in developing innovative solutions for medical tests, increasing accuracy by 20%.
- Converted MATLAB code to Java/Kotlin for medical tests.
- Implemented new features like Wikipedia audio/video calls and screen sharing.

Senior Android Developer
Axact, Islamabad, Pakistan | 12/2017 – 04/2019
- Participated in the full development cycle, producing high-quality, testable code.
- Identified and resolved bottlenecks and bugs, troubleshot code issues, and maintained high code quality.
- Kept updated with state-of-the-art development tools and platforms.

Android Developer
Jolta Technology, Islamabad, Pakistan | 12/2015 – 12/2017
- Developed apps from mockups, created modules, and integrated them into projects.
- Performed QA and uploaded builds to the Google Play Store.

Android Developer (Intern)
Zong CMPak, Islamabad, Pakistan | 07/2015 – 09/2015
- Developed the "E-Challan System" application as part of Android Development training.

Education
Bachelor of Science in Computer Science
Muhammad Ali Jinnah University, Islamabad, Pakistan | 08/2011 – 06/2015
